200 years since the first major trade pact, 200 years of friendship with the US

The bonds between our peoples began when individual American and Greek traders rolled up their sleeves to help Greece achieve its independence from Ottoman power in 1821. Since then, the United States and Greece have been shoulder-to-shoulder to support each other’s development, to foster peace, prosperity, and stability, and to advance our respective Western Mediterranean and Western Balkan interests. Today, Greece has emerged from a decade of financial hardship and a period of slow growth to become a robust and stable economy. It has strengthened its position as a trading partner of the United States and a leader in innovation and technology.

The relationship between our two countries has evolved from trade to encompass a broad range of cooperation, from bilateral treaties and agreements to collaborative projects in science, education, and technology. The United States and Greece continue to work together on a range of issues, including energy, defense, and cultural heritage. In this spirit, the United States and Greece are collaborating on the Mytilini Gas Works Project, a major energy infrastructure project that will help Greece diversify its energy sources and reduce its dependency on imported gas.

In addition, the United States and Greece are working together on the implementation of the 3rd Joint Strategic Plan, which focuses on deepening their partnership in the areas of defense, intelligence, and economic growth. The countries are also collaborating on the implementation of the 4th Joint Strategic Plan, which aims to further strengthen their cooperation in the areas of security, energy, and technology.

In sum, the United States and Greece have a long and successful history of cooperation, and the bonds between our peoples remain strong.

Eastern Mediterranean and Western

company, stuffed by specialized estate agency which holds a leading position in the market. The strategy of design, their locations, and their value are what make them stand out.

These companies and many others are now exploring their potential in Greece, a gateway to the Balkan region of 38 million people who are looking for opportunities. At the same time, Prime Minister

Piraeus Real Estate is the subsidiary of the Piraeus Bank Group, responsible for the complete design and implementation of the strategy and policies of the Group’s Piraeus Real Estate division, while heading other subsidiary companies of the Group in Greece and abroad.

It provides the full spectrum of services related to real estate development, development, monitoring and management of the real estate sector at any value and size. By ensuring the largest real estate portfolio in Piraeus, Piraeus Real Estate focuses on the selection and sale of real estate, real estate development, construction management, asset and property management, real estate sales and marketing.

The country has overcome the financial crisis of 2010 and has now entered a new era for investments in real estate. Traditionally known for its high standards in property management and the exclusive quality of its services, Piraeus Real Estate is always in search of new opportunities and investors to create value in the real estate market.

In 2017, the country hosted a significant increase in foreign interest, with a focus on the Greek land market. The real estate market in Greece has been on an upward trend since the financial crisis of 2008, with property prices in some sectors being significantly lower than pre-crisis levels. The Greek government has also implemented several policies to attract foreign investment, including tax incentives for foreign investors.

In conclusion, Piraeus Real Estate is a leader in the Greek real estate market and is dedicated to providing high-quality services to its clients. The company is committed to creating value in the real estate market and is always on the lookout for new opportunities and investors to support its growth.
